T&D Data Logging Systems: Choice Means Solutions

TR7 series

LAN communication data loggers for cloud or local storage

TR7A Features

Wireless LAN for auto data upload to cloud
 USB connection to PC or Bluetooth connection to mobile device for setup and download
 Vaccine Mode settings for VFC compatible models TR71A/75A

TR-7nw Features

Wired LAN for auto data upload to cloud
 USB connection to PC for setup and data download
 Remote access to cloud data via mobile device

°C %RH TC

Bluetooth LAN USB WebStorage

RTR500B series

Wide selection to meet your needs: 7 types of data loggers and 3 types of base stations

Base station for auto data collection and transmission to cloud or designated location

Monitoring of current readings
 Alert and notification features

°C %RH CO2 Pt TC V mA P Ix UV

Wireless Bluetooth LAN 4G USB WebStorage

TR4A series

Bluetooth-enabled data loggers for easy data collection and management via your mobile device

Mobile applications are available for setup, data collection, and report creation/output

Download data to your mobile device
 Upload and share data in the cloud

°C %RH Pt TC

Bluetooth WebStorage

T&D offers free software, applications, and online services to help you take full advantage of all the features of T&D Data Loggers.

T&D WebStorage Service

Access the online demo Now! » <https://www.webstorage-service.com/>

By setting up any of our compatible products to transmit data to our dedicated Internet server, you can use our WebStorage Service to access and share your data anytime from anywhere.

User-Friendly Software and Apps

Find the appropriate software or app that fits your product and needs - including a high-performance graphing software T&D Graph and user-friendly mobile apps which allow direct wireless communication between your smartphone/tablet and loggers.

TR-5i series

Line-up of 7 types of compact durable waterproof loggers

On-device LED flash warning notification

Long battery life up to 4 years

Easy data collection with the use of the communication port connected to a PC

°C Pt TC V mA P

Collector

TR-7Ui series

Array of models for measuring temp/humidity plus CO2, UV, Illuminance and Barometric Pressure

Simple USB connection to PC for easy data download

Data analysis using graph tools

°C %RH CO2 Ix UV hPa

USB

MCR series

4-channel battery operated data loggers

Connect 4 units for up to 16 channels of simultaneous recording

Large capacity internal memory + SD memory card support

Trend graph for real-time data check

TC V

SD Card

RTR-600 series

Wireless data logger for internal temperature of food and liquid

Totally sealed design ensures no oil or water corrosion

Auto upload logged data to our cloud service or your FTP server
