Software for Data Management and Analysis

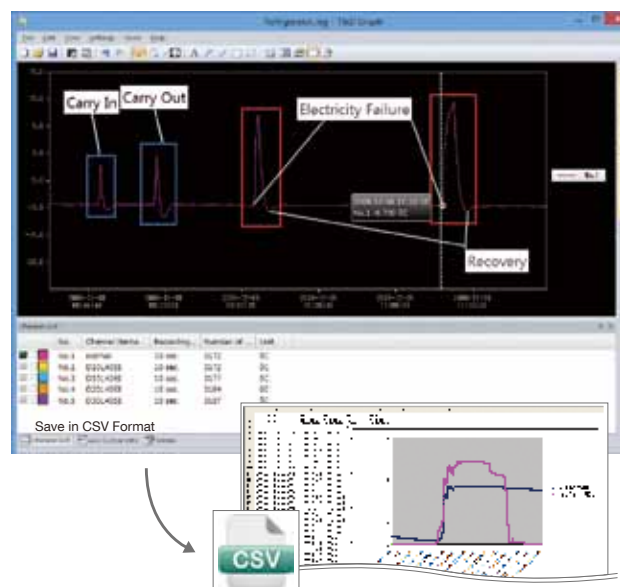

Current Readings Monitor (for RTR-500NW / 500AW)

The "Current Readings Monitor" application runs on your PC, monitoring current readings over a LAN network, automatically updating data at a set interval.

T&D Graph

"T&D Graph" is our newly designed advanced graph application with an enhanced capability to display and analyze recorded data with more visual expression than ever before. Its useful features include advanced search feature and data analysis.

FOOD SAFETY with T&D

T&D

The easiest way to reliably monitor and report data across an entire enterprise.

T&D has wireless and network connected solutions for monitoring all aspects of food preparation, transportation, storage, and service. Whether you collect data locally or from a remote location,

T&D provides systems that can automate the process and ensure error-free record keeping with no monthly fees or recurring charges.

If you are a professional concerned with Food Safety and preventing loss of refrigerated product, T&D has the tools you need to get the job done.

STORAGE

- Monitor and record zones in cold storage warehouses
- Monitor refrigerators and freezers
- Automatic warnings for loss prevention
- Monitor shipping and receiving areas and loading docks.

TRANSPORTATION

- Remote monitoring through Cellular Network
- Automatic data downloads and warning notifications
- Real-time monitoring while in transit
- GPS Tracking

HEADQUARTERS

- Collect and monitor data, without local PCs, from remote locations
- Data can be downloaded automatically, even from shipments in transit
- Receive real-time warning notifications from anywhere, on your PC or any web-enabled device
- Error-free record keeping in one central location using "The Cloud" or your own Company Server

PREPARATION

- Measure and record temperatures in ovens, deep fryers, kettles, etc.
- Measure and record internal temperature of meat and poultry while cooking
- Monitor refrigerators and freezers prior to preparation and shipment

SERVICE

- Monitor receiving areas, refrigerators, and freezers
- Record and monitor food holding trays, bins, and CVAPs
- Record temperatures of service line items
